

Superior Graphite will be exhibiting at SAE Brake Colloquium & Exhibition on October 5-8, 2014 in San Francisco

Come visit us at Booth 204!

SAE International is a global association of more than 138,000 engineers and related technical experts in the aerospace, automotive and commercial-vehicle industries. SAE International's core competencies are life-long learning and voluntary consensus standards development.

The SAE 2014 Brake Colloquium & Exhibition provides industry leaders with the most critical and up-to-date information on braking and brake systems for OEMs, aftermarket customers and end-users. SAE Brake Colloquium is an opportunity to network with some of the best minds in the world to work together in creating braking systems that are safe, efficient, refined and environmentally sustainable.

Superior Graphite Will Be Featuring the Following Products:

Resilient Graphitic Carbon product line:

RGCs are used as friction modifiers in brake linings to control and adjust the compressibility of the pads, regardless of the working temperature. RGCs also strongly contribute to noise reduction and reduce vibration development.

Formula FX™ Graphite and Coke:

Designed to meet the rigorous requirements of the Friction Industry, FormulaFX™ is available in a variety of grades, from synthetic to crystalline flake graphite to calcined petroleum coke, each with distinct performance characteristics to satisfy specific industry applications.
