

Superior Graphite will be exhibiting  
at the American Farm Bureau Federation Convention  
on January 9-11, 2016 in Orlando, FL  
at Orange County Convention Center

## 2016 AFBF Annual Convention & IDEAg Trade Show

The American Farm Bureau Federation (“AFBF”) is one of the nation’s largest general agricultural associations. More than 6.1 million American families are members of Farm Bureau in all 50 states and Puerto Rico. Each January, thousands of members, as well as attendees come to this show to conduct business on the trade show floor, expand their knowledge at educational workshops, vote on up-and-coming businesses trying to achieve the American dream, and network with their peers.

***Superior Graphite Is Pleased to Feature the Following SLIP Plate® Products  
at the Grainger Booth # 431***

### **Seed SLIK™ Dry Graphite Lubricants**

Graphite seed flow lubricants, are made from high quality graphite powders from environmentally safe, natural mineral, and will not hurt seeds, or plantings as they grow. Small seeds benefit from the addition of graphite, allowing them to slide easily off the planter plates. Seed SLIK™ Graphite is a preferred lubricant for planting in high humidity environments. Seed SLIK™ Talc is a good alternative to graphite for planters with new electronic seed meters that sometimes give false readings with graphite. Seed SLIK™ Blend is a unique talc/graphite blend that is commonly used in many new mechanical plate and vacuum planters for increased lubricity and wear protection. It also will aid in reducing particle agglomeration that is common with using a 100% talc powder in higher humidity environments.

### **SLIP Plate® Heavy Duty (No. 1)**

This product is the original graphite dry lubricant in the market used to solve sliding friction problems since 1975. SLIP Plate® Heavy Duty is formulated with a very high concentration of friction fighting graphite and a proprietary binder system to provide a long-lasting dry lubrication for the heaviest loads. When applied and dried, this product creates a dry anti-friction graphite coating that does not attract and trap dust, dirt, mud, or grit as compared with greases and oils. Naturally hydrophobic, it provides lasting protection from rain, snow and mud to help to prevent rust and corrosion. SLIP Plate® reduces wear and extends the operating life of machinery.
