

Superior Graphite will be exhibiting at **Euro Brake 2015 Show**
on May 4-6, 2015 in Dresden, Germany

EuroBrake 2015 Show
May 4-6, 2015
Dresden International Congress Centre
Dresden, Germany

Come visit Superior Graphite at Booth 62!

EuroBrake was created in 2012 to address the profound changes in the demands made by the braking industry's customers and end-users, and to provide a forum for companies and engineers working in the area of brake technology to come together to share ideas.

In the few short years since then, EuroBrake has become the must-attend event of the braking industry calendar. EuroBrake has grown annually in exhibitor and delegate attendee numbers, with over 800 delegates attending EuroBrake 2014. Featuring more than 100 technical presentations and 70 exhibitors, EuroBrake is the world's largest dedicated braking conference and attracts engineers, scientists and executives from the industries of passenger car, commercial vehicle, rail, aerospace and the other industrial fields.

Superior Graphite Is Pleased to Feature the Following Products:

Resilient Graphitic Carbon product line:

RGCs are used as friction modifiers in brake linings to control and adjust the compressibility of the pads, regardless of the working temperature. RGCs also strongly contribute to noise reduction and reduce vibration development.

Formula FX™ Graphite and Coke:

Designed to meet the rigorous requirements of the Friction Industry, FormulaFX™ is available in a variety of grades, from synthetic to crystalline flake graphite to calcined petroleum coke, each with distinct performance characteristics to satisfy specific industry applications.
