

SUPERIOR  GRAPHITE

**METALPURE™**

## MetalPURE™ Consistency For The Long Run

***In the race for perfection in graphite for powder metal, you'll see a competitive edge with MetalPURE.***

P/M powder and parts manufacturing demands perfection in every facet of the process. From raw material to the final product, only the best will do in today's competitive marketplace. MetalPURE powder metal graphite and carbon products meet your need for high standards of quality with pure products offering consistent particle sizes to improve flowability, density/strength properties, as well as reduce dimensional loss rates.

In the race for perfection, you can depend on the quality, consistency and purity of MetalPURE. Its dedicated engineering is designed to keep you in the lead.

## Advanced Milling Processes

The quality and competitive performance of MetalPURE starts with an advanced, state-of-the-art milling process. The MetalPURE milling process has been carefully designed by the industry's leading professionals. It has been created to not only meet the highest standards of environmental friendliness, but also to be highly efficient in terms of both quality and productiveness. Using customer recommendations and insights, MetalPURE engineers have made a milling process flexible enough to produce a broad spectrum of graphite products for almost every possible P/M application, without sacrificing quality or production responsiveness. Superior Graphite's MetalPURE is capable of delivering the highest levels of consistency and quality available in the industry today.

## Custom Designed Grades

While the purity and consistency of MetalPURE is certain to meet your criteria for quality, it is the ability of MetalPURE engineering to deliver custom products, designed to meet your exact specifications, that makes MetalPURE a viable and preferred resource for your P/M operations.

Our commitment to customization capabilities and technological depth allows Superior Graphite to custom-pack any MetalPURE product you or your customers may require. Talk to the MetalPURE Customer Service department about customization solutions and alternatives, today.

# SUPERIOR GRAPHITE

Superior Graphite specializes in thermal purification, advanced sizing, blending, and coating technologies, providing value added graphite and carbon-based solutions globally.

Combining 90 years of experience and advanced technologies into every facet of the organization, a wide range of markets are served such as; agriculture, battery/fuel cells, ceramic armor, carbon parts, ferrous/nonferrous metallurgy, friction management, hot metal forming, polymer/composites, powder metals, lubricity, and performance drilling additives.
